Making Digital Work

Thanks for showing an interest in joining us as part of One Digital! **This course is for you if you want to make better use of digital in your organisation**. We appreciate that for third sector organisations to take time out for training can be a big commitment. We hope the following information helps to inform your decision to take part and allows your organisation to get the most out of the One Digital opportunity.

The One Digital Opportunity

One Digital is more than a training day, there is a lot of support available over the course of 2016. The training is designed to build your knowledge about digital participation and give you a framework to use when **deciding how to use digital more effectively in your organisation**.

Please note this is **not a practical course** and you will **not be learning IT Skills** during the day. You will be introduced to online learning tools for you to explore after the training day.
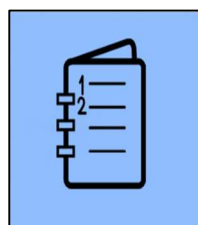

1. Your Making Digital Work Session

Your one day face-to-face session will explore:

- The benefits of digital for third sector organisations
- What makes a good digital organisation
- Reviewing scenarios with practical digital solutions and tools (these will be tailored to you and the other participants)
- Developing an Action Plan for a digital change you wish to make in / for your organisation to make it more effective or efficient.
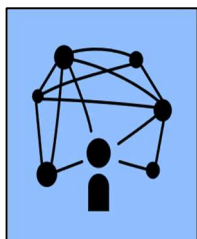

2. Your One Digital Action Plan

During the session we will help you to create your One Digital Action Plan. This will include:

- What digital change your organisation wants to make
- How you plan to make this digital change
- What resources you will need to do this
- When you expect to have achieved your digital change

3. Engaging with the One Digital network

You'll have access to a local and national One Digital network for further support, development and sharing good practice as and when you need it. This includes:

- Access to our online module to build on your face-to-face session (Mozilla Badge accredited)
- Support from our online mentors
- Access to further resources, guides and tools
- Opportunities to attend further sessions and events
